

Improve customer satisfaction with a CX AI platform

NiCE

80%

of customers consider experience as important as the product or service itself.

PwC

Deliver seamless, personalized experiences across all touchpoints with [AI-driven customer engagement.](#) ➔

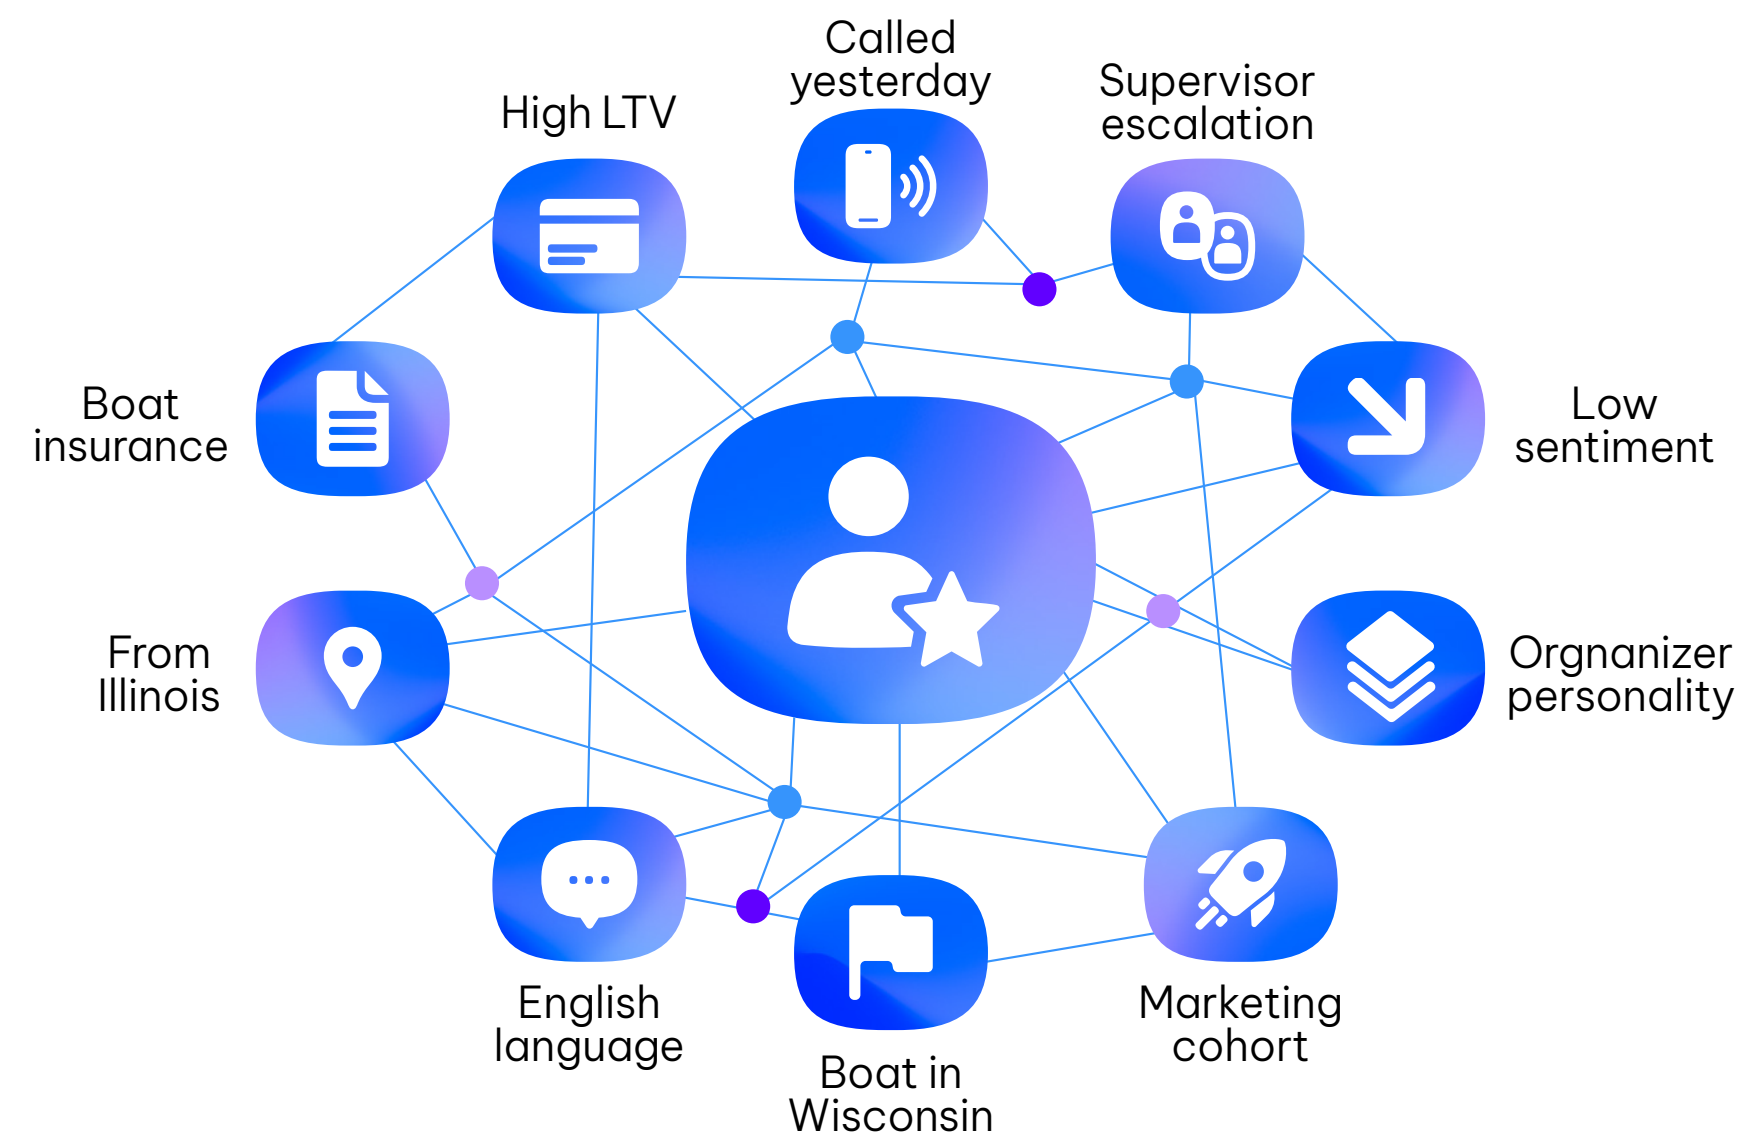

Improve CSAT with highly personalized customer experience

Connect each customer to the best available skilled employee for a personalized, frictionless customer experience.

- Route interactions based on any attribute—skills-based, intent, predictive, attribute-based, bullseye, sentiment, historical behavior, and more.
- Choose and combine routing modalities with a unified engine that orchestrates customer interactions across 30+ voice and digital channels.

Create lasting impressions with AI-driven personalization

The NiCE difference

Optimize routing decisions in real-time. AI routing instantly analyzes limitless data attributes and deploys predictive models to drive target KPIs, like NPS and CSAT.

“AI routing aligns our customers and agents in a way that creates **an experience that differentiates us** and makes the customer appreciate the relationship with us.”

VP Forecasting and Financial Excellence
Fortune 50 Media Company

Boost customer sentiment with specialized copilots for employees

Give employees real-time guidance on behaviors that influence customer sentiment with recommendations to boost satisfaction in the moment.

- Harmonize human and AI collaboration with specialized copilots for agents, supervisors, and CX leaders.
- Use a conversational, intelligent interface to understand data faster.

Proactively improve behaviors that impact customer sentiment in real time

 Inappropriate action	 Promote self-service	 Acknowledge loyalty
 Demonstrate ownership	 Build rapport	 Be empathetic
 Effective questioning	 Set expectations	 Active listening

The NiCE difference

Enhance engagement quality to boost customer sentiment with AI copilots for employees that proactively serve up accurate replies, initiate automated workflows, and offer behavior coaching.

“Brands excelling in customer sentiment outperform their peers by an impressive **43 percentage points in stock returns** over five years.”

The State of CX, NiCE

[Learn more](#) →

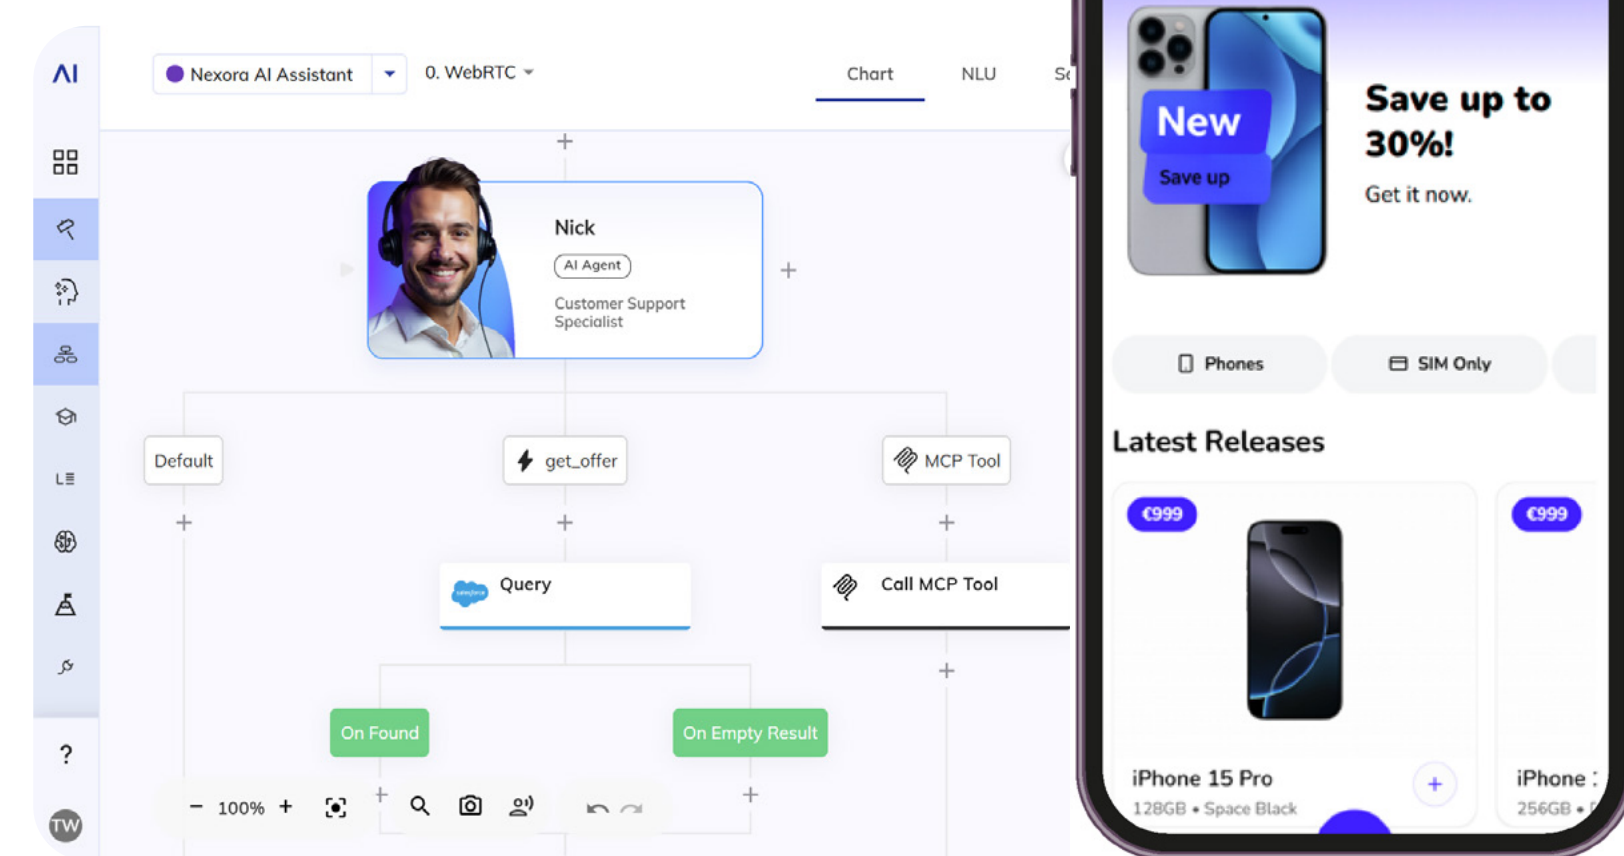

Keep customers happy and problems short with AI agents for self-service

Give customers what they want: answers that land fast and land right. AI agents handle the everyday questions with calm precision, so no one's left waiting and no issue drags on longer than it should.

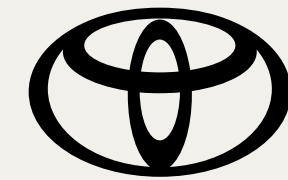

AI agents step in early, guide people through the next step, and keep friction out of the way. Whether someone needs a quick update, help on checkout, or a nudge to finish a form, the right support shows up at the right moment.

The result is simple: smoother interactions, fewer dead ends, and customers who feel taken care of every time.

The NiCE difference

Anyone can talk about AI agents. NiCE Cognigy delivers them, in live environments, at enterprise scale. These case studies show what happens when AI is built to work, not just to demo.

“AI resolved **41.1% of interactions without requiring live agent support**, underscoring the effectiveness of AI in managing a significant portion of customer inquiries autonomously.”

The NiCE difference

Customize each survey based on the specific customer interaction, utilizing AI integrated into Feedback Management native on the NiCE CXone platform.

“It was like going from a cassette tape to digital streaming. With all of the automation, the visuals, the charts, the graphs, Feedback Management **automatically does what used to take me hours.**”

Senior Quality Analyst,
an HR & Financial Management Company

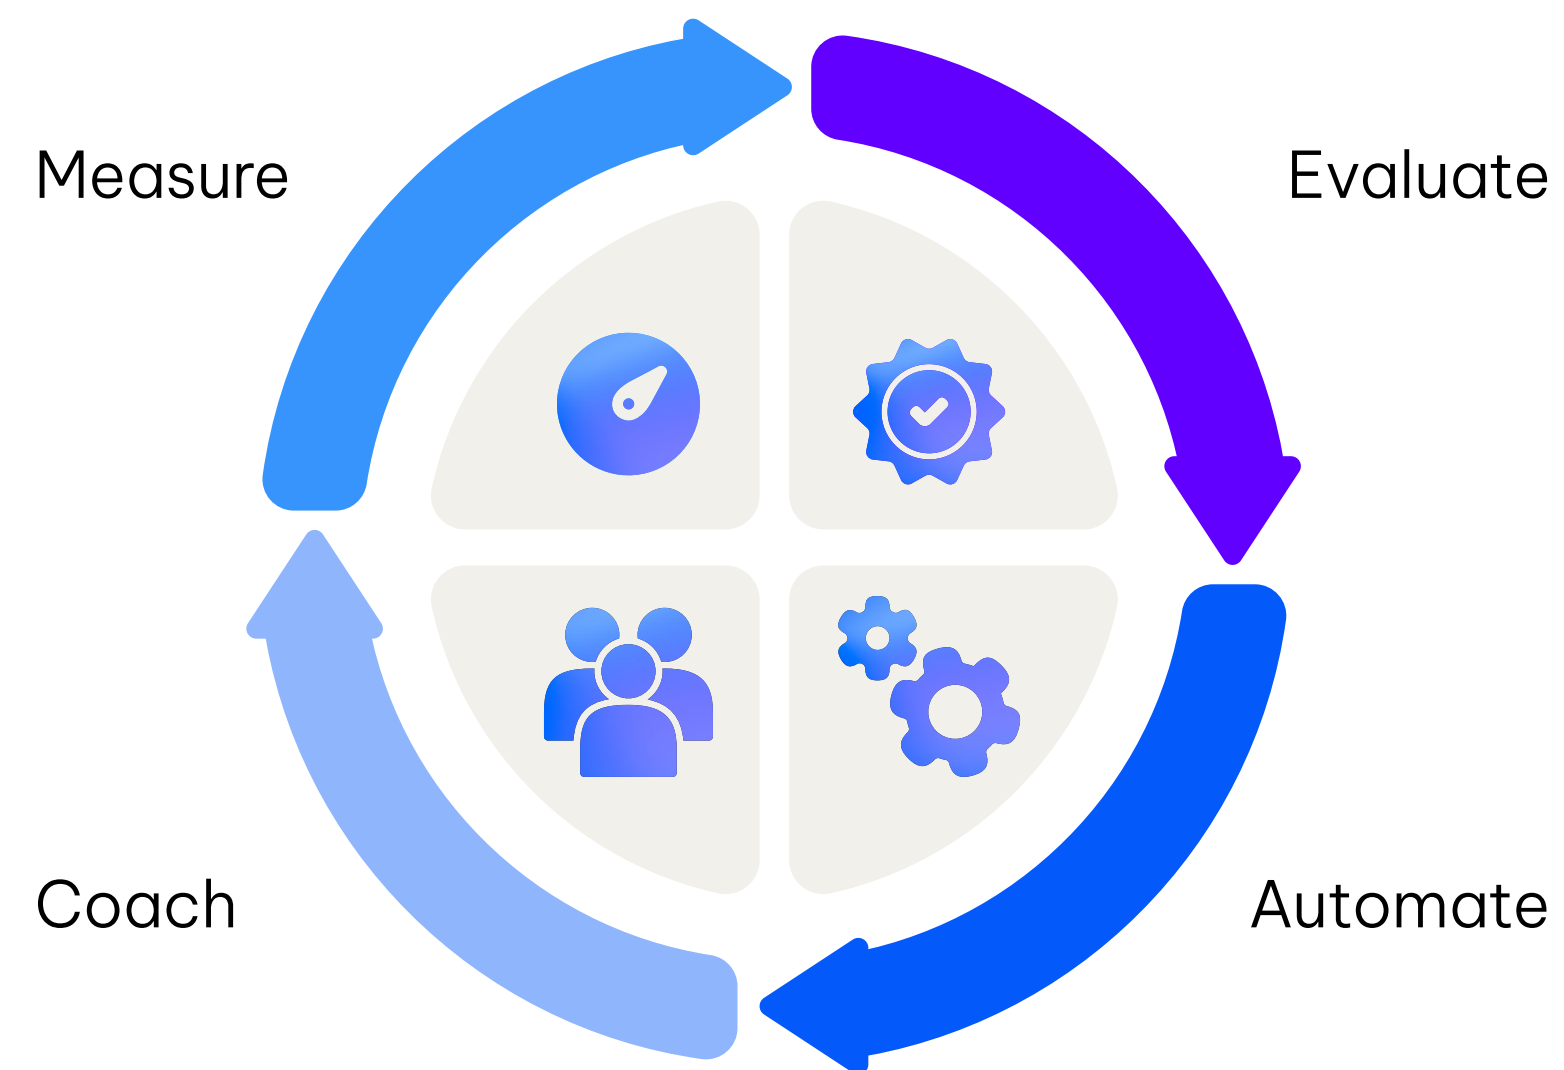

Drive customer satisfaction with quality management

Build emotional loyalty and reduce customer effort with higher quality interactions. Objectively evaluate and coach agents on soft-skill behaviors proven to boost sentiment, such as active listening.

- Optimize quality scoring with the ability to automate scoring across customer service, saving time and cost.
- AI trained on successful behaviors delivers unbiased, objective assessments and actionable recommendations, enabling targeted coaching to drive measurable impact with CSAT goals.

The NiCE difference

AI-driven quality management removes the burden of manual scoring by AI-driven quality management by automatically analyzing calls, tracking sentiment, coaching agents, and ensuring compliance.

“We’re able to identify an issue that customers are calling about more today than they were yesterday and **get in front of it with proactive communications** or training.”
